

All dogs, no matter what type of breed should be not left unattended more than 15 mins. In their yard tethered or not tethered in weather 85 degrees or higher or 32 degrees or lower. All dogs should not be left outside during summer months between 12 pm to 4pm. The shelter must provide shade .The structure the canine is in should be ment to be a dog house. A porch or stairs with an awning or a deck is not considered a dog house nor a crate or carry box. A dog house built for a dog is the only type of structure suitable. Hay in the winter for bedding is necessary because even if the dog is of the Alaskan type, frostbite can occur from the bedding getting wet and below freezing temperatures. Hay will prevent that. No dogs should sleep outside at night unattended. Water must not be able to freeze while dog is outside or evaporate in summer months. A fountain bowl for summer or a heating system in winter for water is a must. Christine Goupil was kind enough to share her compassion towards animals with myself as well. Thank you.
